

Erasmus+

AR Walker

The purpose of this application is to familiarize the ship's personnel with the equipment and the various indications on board to deal with or prevent fire damage. The education officer in charge is required to place the IMO signs recognized by the application at visible points near each piece of equipment.

For example, the mark of a 6 kilogram foam fire extinguisher should be placed next to the corresponding fire extinguisher in a well-visible spot. This way, users running the application while visiting various points of the ship can target the mark beside the fire extinguisher to learn more about it and have the educational material provided by the app displayed.

This application provides information material and questions of theory aimed at self-evaluation. Furthermore, in selected cases, some audiovisual (video) material is also provided for the demonstration of use of the equipment.

Generally, the signs themselves indicate the object they are meant to describe. As mentioned above, in the example of the fire extinguisher, the images consist of real signs used on ships.

Below are the IMO signs that are needed for this application. They are to be placed at points around the device or equipment mentioned, with preference to well-lit, bright spots.

Installation of the application

In order to install the application, you must visit the NAFTES training platform, at <https://etraining.naftes.eu/> and from there download the **AR Walker** application.

In addition, you need to print the marks listed in this file for the corresponding application and place them in bright spots near the equipment they describe.

FIRE-RESISTANT SUIT

ANTI-FLASH HOOD AND GLOVES

EMERGENCY ESCAPE BREATHING DEVICE (EEBD)

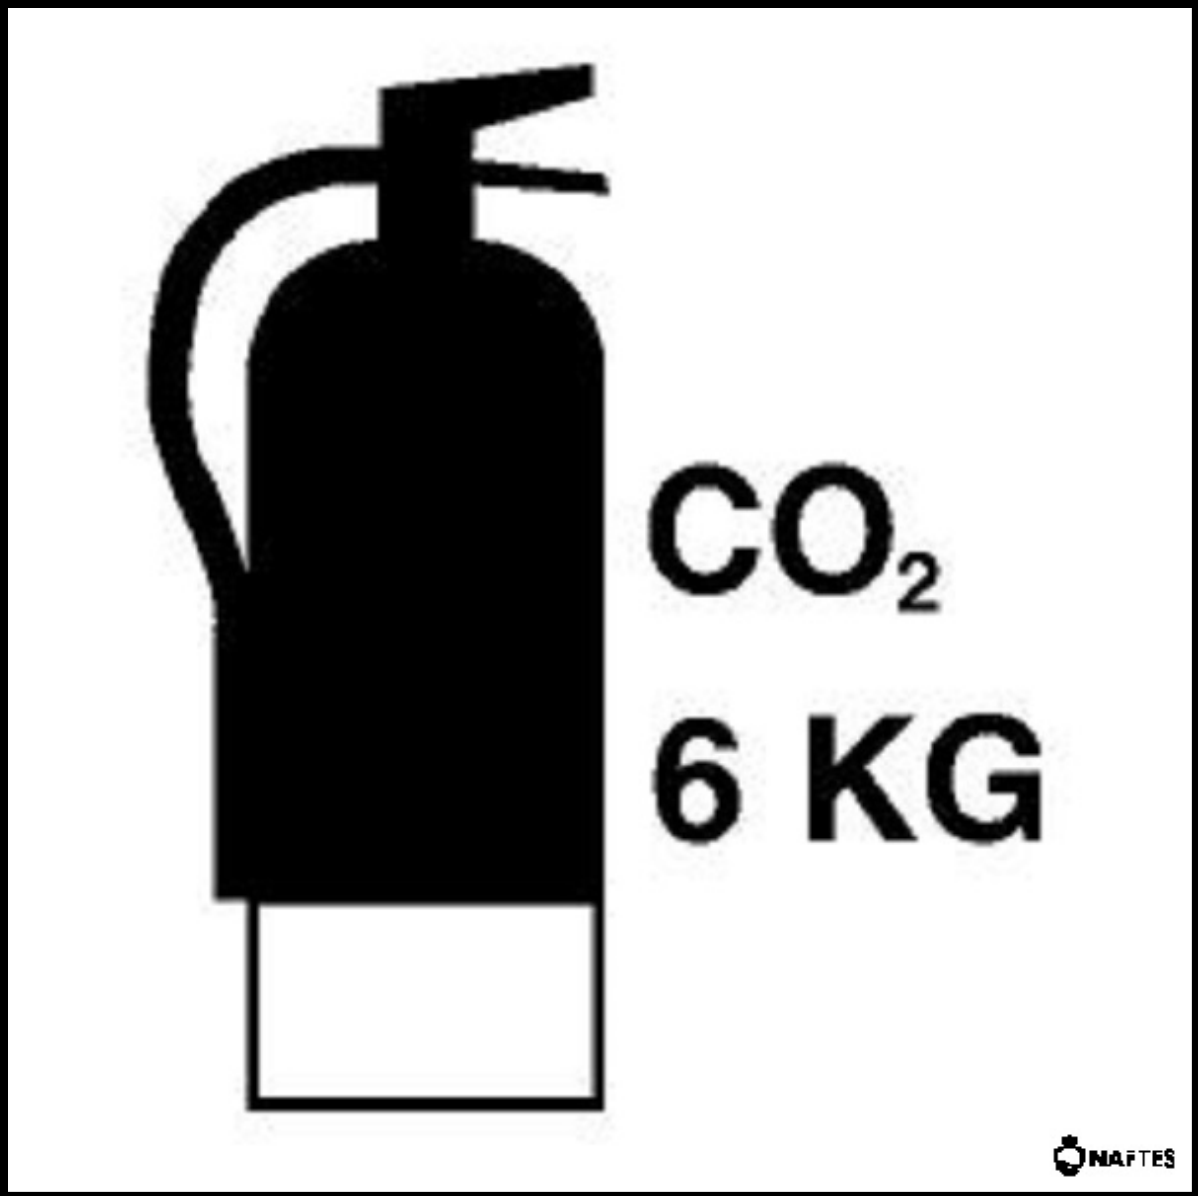

POSITIVE PRESSURE BREATHING DEVICE

PORTABLE PKP DRY POWDER FIRE EXTINGUISHER

DRY POWDER FIRE EXTINGUISHER

CO2 FIRE EXTINGUISHER

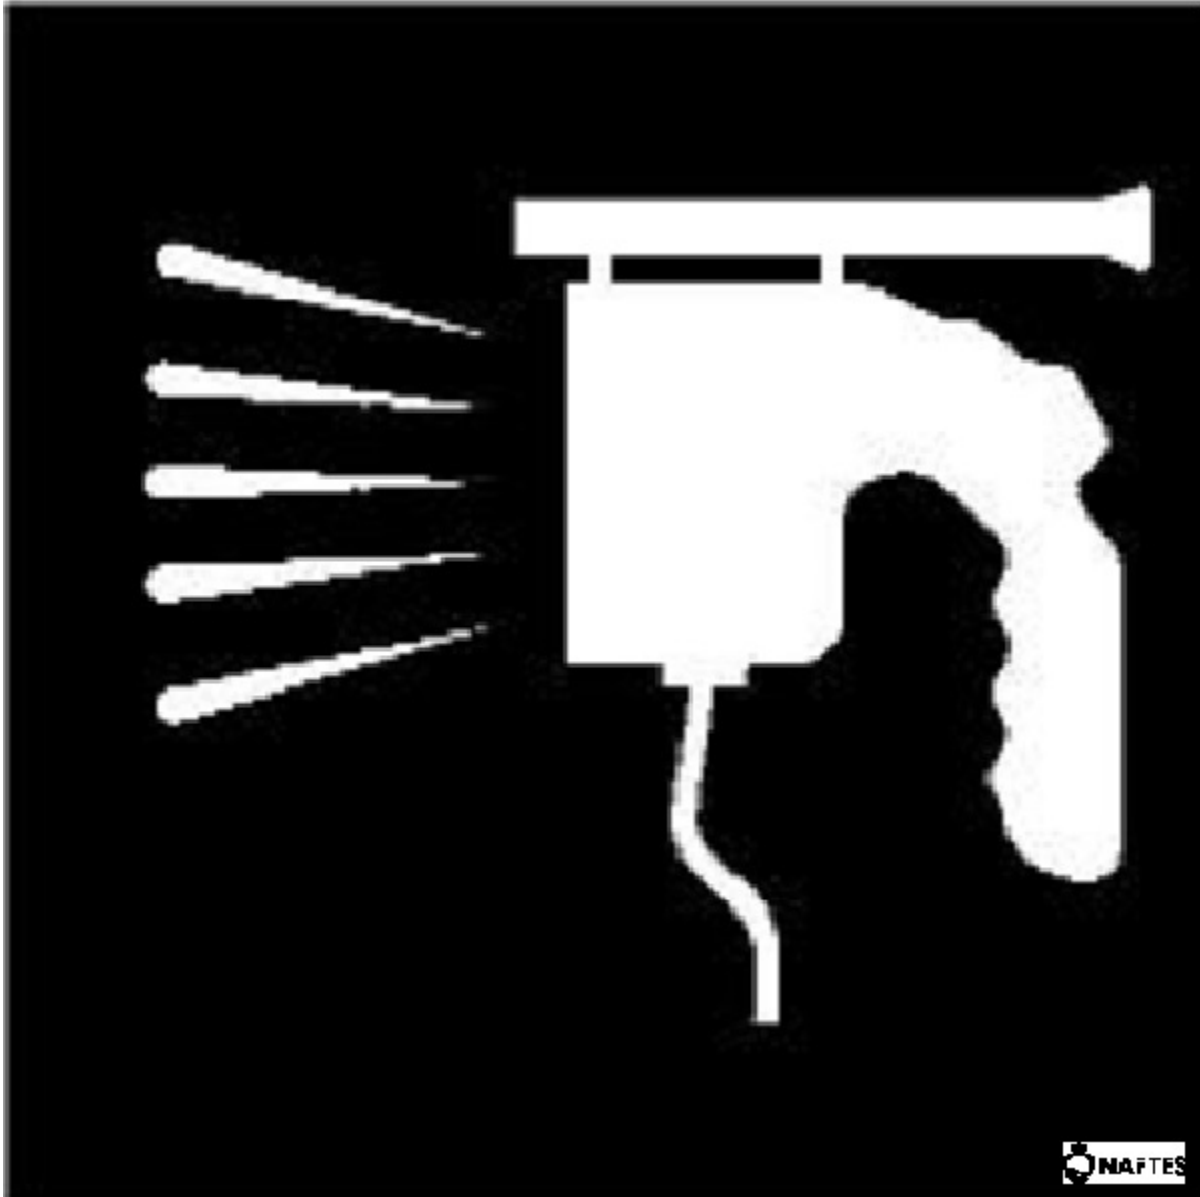

PORTABLE WET CHEMICAL FIRE EXTINGUISHER

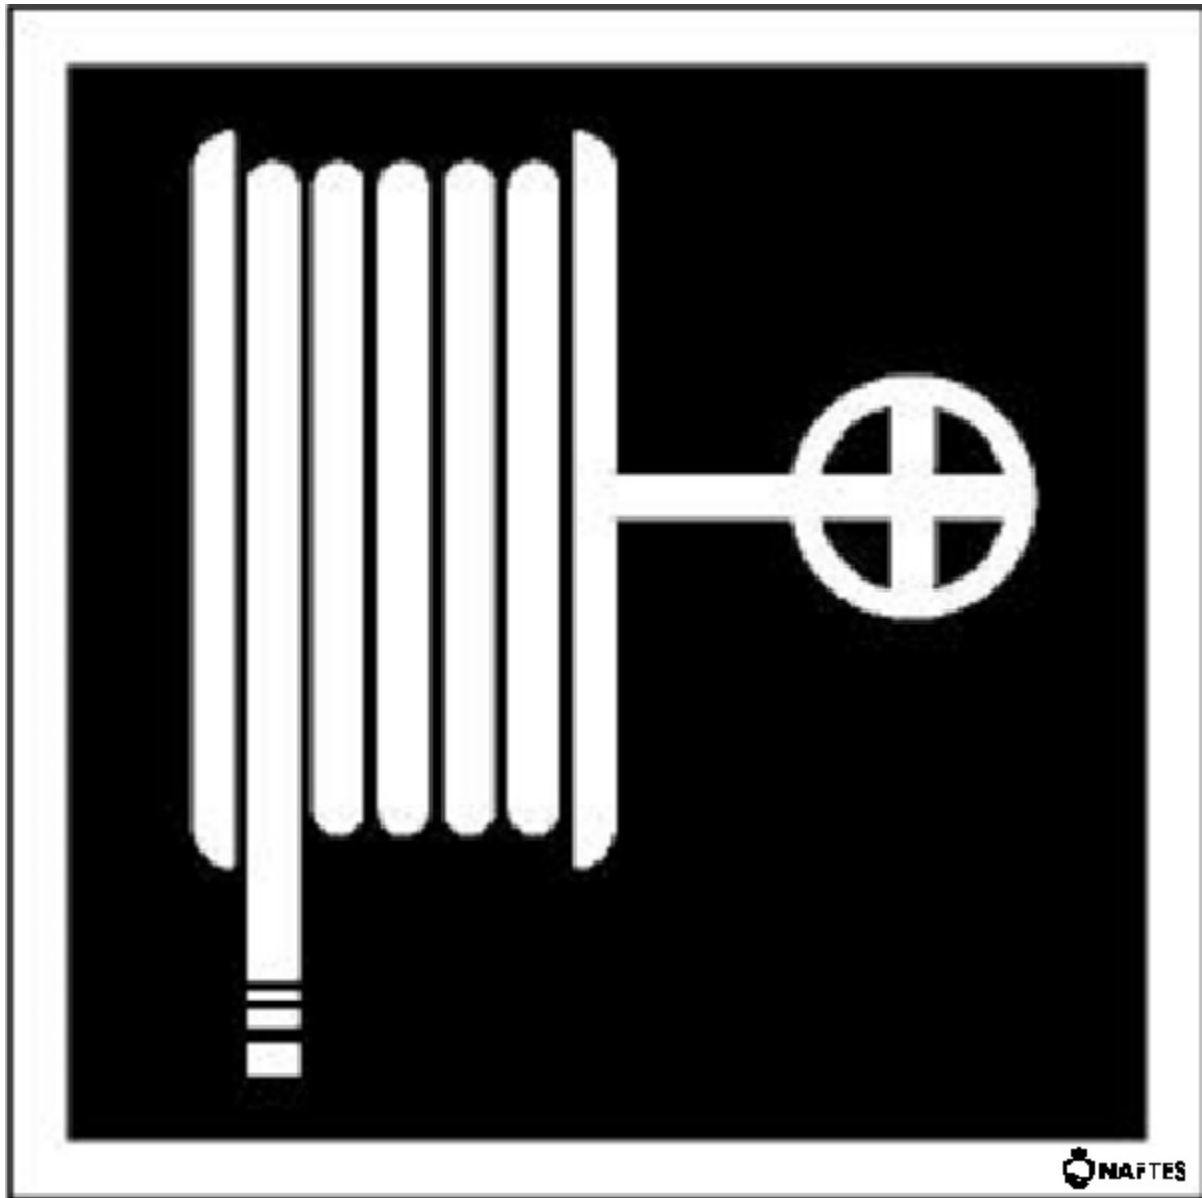

Foam
